
SB01

**Sub Bass
Loudspeaker Cabinet**

acoustic technologies

The Acoustic Technologies SB01 Sub Bass Cabinet substantially redefines the size and performance expectations for compact sub bass enclosures !!

The SB01 utilises a high powered 15" transducer specifically designed for sub bass applications. The extended length voice coil and innovative suspension system provides exceptional performance under high level, high excursion signal conditions. This allows the SB01 to provide a full power response to a low 45Hz, free from any colouration or distortion caused by over excursion or cone breakup.

Just punchy, full, fat bass energy!!

And yet, the SB01 remains a remarkably compact and easily transported loudspeaker enclosure, ideal for Live Music Applications, Mobile DJ's, Karaoke Artists, and Audio-Visual Presentations to name but a few. The SB01 also finds ready acceptance in pro-audio installations and can be found in Night Clubs, high-end Restaurants and Wine Bars, Cinema's and House of Worship Systems.

The SB01 is available with many finish and hardware options making for a truly versatile and professional sub bass loudspeaker cabinet.

SB01 EXCELLENCE IN AUDIO
